

Careers@Singapore: Research & Academia

16 -20 September 2013
Switzerland & United Kingdom

Situated in the heart of Asia, Singapore is brimming with opportunities for bright and ambitious research talent and academics

Singapore tops the world per capita in investment on science and technology, with a budget of SGD 16.1 billion (GBP 8 billion) earmarked for research investment from 2011 to 2015. The government is building infrastructure for scientific exploration at an incredible pace and encouraging breakthrough discoveries with generous funds. As a result, many exciting research and academic opportunities are available for experienced candidates in the areas of **Science and Technology in particular with the following institutions for the stated research areas**

- **Nanyang Technological University (NTU): Clinical science, Clean Energy (Solar and Water) and Engineering (Computer Engineering/Computer Science, Electrical and Electronic Engineering, Environmental Life Sciences Engineering, Manufacturing and Repair Technologies)**
- **Singapore University of Technology and Design (SUTD): Architecture and Sustainable Design**

Contact Singapore, together with our research and academic partners, are pleased to present a series of recruitment events to showcase the breadth of opportunities within Research and Academia in Singapore.

ABOUT CONTACT SINGAPORE

Contact Singapore is an alliance of the Singapore Economic Development Board and Ministry of Manpower. We engage overseas Singaporeans and global talent to work, invest and live in Singapore.

Contact Singapore actively links Singapore-based employers with professionals to support the growth of our key industries. We work with investors to realise their business and investment interests in Singapore.

For information on working, investing and living in Singapore, please visit www.contactsingapore.sg or contact our worldwide offices.

ABOUT SINGAPORE

In the heart of Asia lies Singapore - a bustling, world-class city state that has made waves around the world for its business excellence, connectivity to the world and its innovation.

Singapore has been consistently acknowledged as a global business hub - one that features developed infrastructure, political stability, open business policies, a skilled workforce, the use of English as the main working language and respect for intellectual property rights. Many multinational companies have chosen to set up their bases in Singapore, next to 154,000 small and medium enterprises. Business owners all over the world regard Singapore as an ideal location to grow their businesses, with many of them using the country as a springboard to tap into other emerging markets in Asia.

Besides being ranked in the World Bank 2013 Report as the world's easiest place to do business (out of 185 countries), Singapore has, among its many accolades, the top ranking in the Global Competitiveness Report 2012-2013 by the World Economic Forum as being the most competitive economy in Asia. Singapore was also ranked by the Mercer 2011 Quality of Living Survey as the top Asian country for its quality of life.

Global talent are attracted to Singapore's meritocratic society that embraces diversity, and a high quality of life in a cosmopolitan environment.
